We, in Agra city, are proud of the fact that we chartered a similar destiny with the nation, growing in leaps and bounds; creating a legacy of success and achievements. We have come a long way from a single minilab operation to becoming the pioneers in providing cable services at such a broad level.

The Company remains committed to maintaining our regime of high standards of corporate governance. We pledge to provide timely and accurate information through announcements and investor relations activities for the benefits of all stakeholders.

The global economy encountered multiple challenges during the past one year. Even as SEA TV accepted many challenges and achieved lot of them. Emerging markets, growing technology, rapid changes in broadcasting sector pose some risk and uncertainties; our company also experienced slowdown in the momentum of growth in the midst of an extended global economy.

I also acknowledge the strong support of our customers, bankers and business associates of our Company in 2013 and are looking forward to your strong support to help the company achieve a better 2014 and beyond.

Last, but not the least, I would like to thank all staff and management for their dedicated services in FY 2013-14 and hope that FY 2014 -15 will yield more better results.

MANAGEMENT DISCUSSION AND ANALYSIS

ECONOMIC OVERVIEW

India is likely to grow by 5.6 per cent in 2014-15 against a projected growth of less than 5 per cent in the current fiscal, a report by India Ratings and Research has said. "The global economy in 2014 appears to be in a better shape than what it was in 2012 and 2013.

"The economic growth in FY15 is likely to be contributed majority by the industrial sector, which is estimated to grow by 4.1 per cent. The rating agency also expects merchandise exports to grow by 8-10 per cent in the next fiscal year.

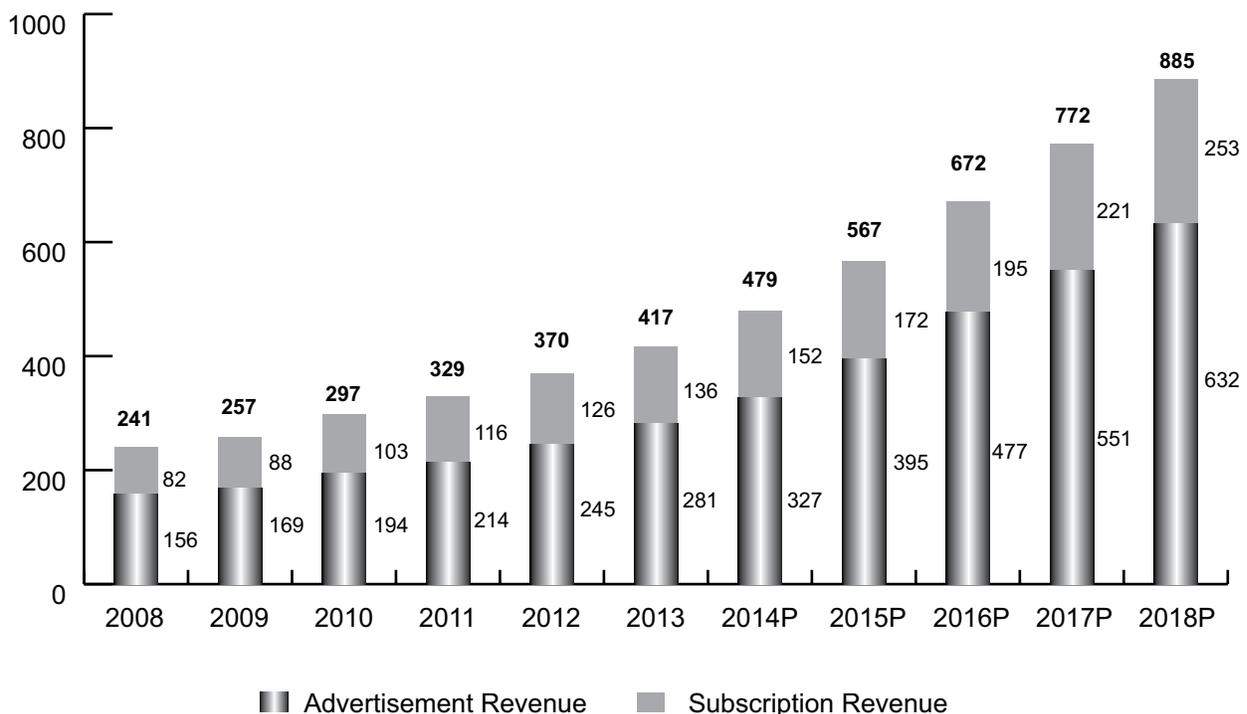

For India, real GDP growth is projected to strengthen to 5.4 per cent in 2014 and 6.4 per cent in 2015, assuming that Government efforts to revive investment growth succeed and export growth strengthens after the recent rupee depreciation,"

INDUSTRY STRUCTURE AND DEVELOPMENTS

The Indian entertainment and media (E&M) industry has out-performed the Indian economy and is one of the fastest growing sectors in India. Indian media and entertainment industry is expected to grow at an annual average growth rate of 18% to touch Rs 2245 by 2017 (Source: CII-PwC). The industry comprises of print, electronic, radio, internet and outdoor segments.. Digitization will facilitate increased number of channels and high quality viewing. The Information and Broadcasting (I&B) ministry has already completed the second phase of digitization, which involved digitizing 16 Million cable TV houses in 38 cities by April 1, 2013. It aims to complete the third phase of digitization which includes all other urban areas (municipal corporations/ municipalities) by September 30, 2014. The rest of the country is likely to be covered by December 2014 under Phase four of digitization.

In India, the ratio of advertising expenditure to GDP is less than 1%. This is substantially lower in comparison to the developed economies as well as other developing economies. Interestingly, Print and TV media contribute over 75% of the advertisement spend in a year. As the Indian economy continues to develop and the media reach increases, the advertising expenditure to GDP ratio is expected to increase over the next 5 years.

PROJECTED GROWTH OF TELEVISION (IN CR.)

AN EXTENDED WAY OF CLARITY – DIGITALISATION

Digitization, while being mandated by the government, is a great initiative that will benefit all stakeholders involved that includes cable service providers, broadcasters, government and consumers. Increased subscription revenues aside, digitization provides cable service providers the opportunity to monetize investments, and evolve to an experience provider with attractive tiring and a la carte option, newer and better services (HD, broadband). Apart from a better viewing experience digitization has the potential to make TV viewing more personal, interactive and social. Today’s consumers want content to be delivered anytime, anywhere and on any device. However, ecosystem players including service providers need to address challenges associated with delivering video content to multiple screens. Technologies such as Cisco Videoscape Unity can play an important role in this.

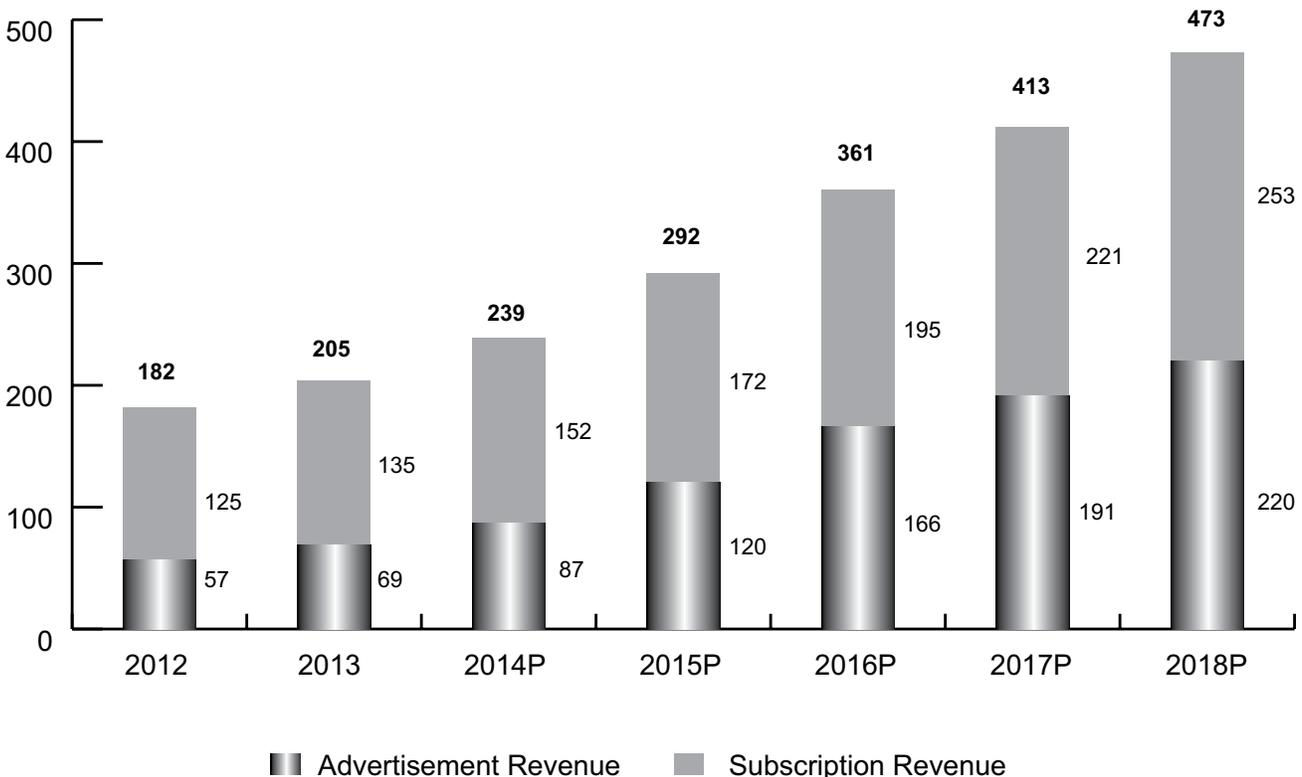

Digitization will also increase broadband penetration in the country. Next cusp of growth for cable service providers will come from offering broadband and at a much lower cost. By adding OTT delivery to the existing service, cable service providers can offer broadcast, on-demand and Internet content to the full range of devices including OTT STBs, connected TVs, tablets, PCs, mobile devices and games consoles. Cable digitization is a move in right direction, however, to differentiate the offering, cable service providers need to take multi screen experiences to the next level, by delivering video in an exciting, immersive, and engaging way.

STRENGTH AND OPPORTUNITY

The Indian Entertainment and Media Industry is undergoing a structural shift in a converging media era where consumers are increasingly taking control of their media consumption. With the evolution of the industry, growth is increasingly being driven by increased consumer spending which has a large impact on revenue streams. Knowledge of evolving consumption trends will be a critical success factor in this scenario. The growth has been evident in varying proportions across the different segments of the Indian Entertainment and Media Industry i.e. Television, Print and Internet (Digital) being the major media in terms of size and growth rates apart from other segments such as radio, out of home, mobile.

HDTV is the future of TV broadcasting. Some of the upcoming technologies is 3D-TV. New technologies provide an opportunity to find new consumers. Standardization of technologies at global level will be the key to their success.

RISKS AND CONCERNS

While digitization has been planned in a phased manner, its successful implementation is critical for the long term growth of the television industry. All Industry stakeholders will need to ensure that issues ranging from infrastructural (Availability of boxes, customer support etc) and funding to customer education are addressed strongly in every successive phase.

“The consumer has so many options to consume content today that if the brand doesn’t look at participating in the content creation process it could face the risk of completely missing out its target audience.”

Two more factors are driving this trend. Many viewers are watching TV shows on the Internet where they see few ads. Also, the Telecom Regulatory Authority of India, the country’s broadcast regulator, has imposed a cap of 12 minutes per hour on ad inventory in TV channels.
